

How to connect to the Project Server with Apple OSX

1. Select the Go menu in the top left portion of your Desktop. Then select Connect to Server at the bottom of the Go menu.

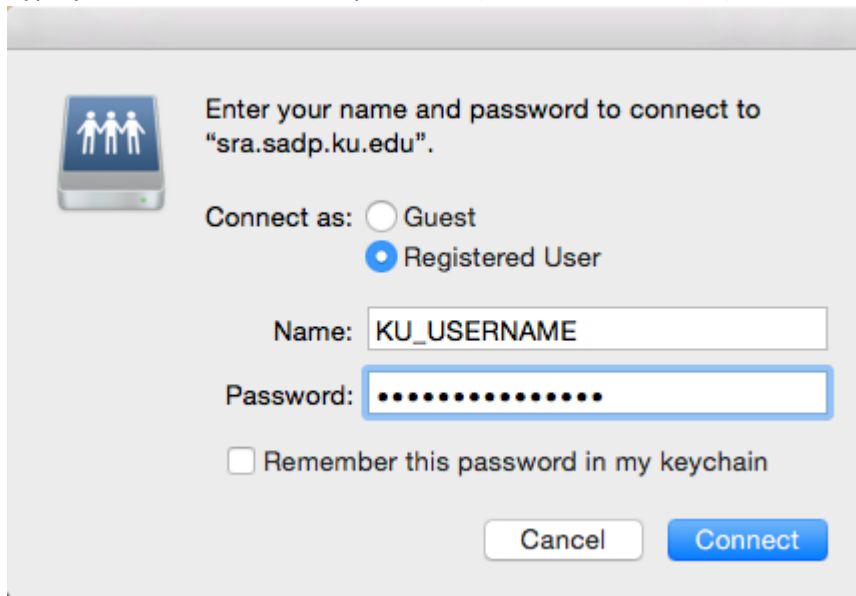

2. In the Server Address bar type **<https://sra.sadp.ku.edu/sadpprojects>** . Then select the plus symbol to the right to save the address as a favorite. Once the favorite is saved you can quick connect to the link in the future. Select Connect.

How to connect to the Project Server with Apple OSX

3. Type your KU Username and password (same used for email). Select Connect.

4. Now you will see the project server folder. There will be several folders based on semester. Open the current semester and you will find your class folders.
